Accounting Officer's Responsibilities and Approval

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and are given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with South African Statements of Generally Accepted Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistent with the requirements of GRAP 3 and supported by reasonable and prudent judgements and estimates by management.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, they are supported by the municipality's auditors.

The external auditors are responsible for independently reviewing and reporting on the municipality's financial statements. The financial statements have been examined by the municipality's external auditors and their report is presented on page 8.

The annual financial statements set out on pages 8 to 67, which have been prepared on the going concern basis, were approved by the accounting officer on the 31 August 2016 and were signed on its behalf by:

Mr T. Jansen van Vuuren
Municipal Manager

Audit Committee Report

Draft

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Officer's Report

The accounting officer submits his report for the year ended 30 June 2016.

1. Review of activities

Main business and operations

Net deficit of the municipality was R 369 028 040 (2015: deficit R 226 750 698).

2. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Subsequent events

Subsequent to the 30 June 2016, Ms P.J. Hlatshwayo has been appointed as the CFO with effect 4 July 2016. This change did not have any impact on the financial position of the Municipality at 30 June 2016. The local government elections were held on the 3 August 2016. The outcome of these elections resulted in an additional political parties forming part of the Council. The executive Mayor was inaugurated on the 18 August 2016.

4. Accounting policies

The annual financial statements prepared in accordance with the Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury, including any interpretations of such Statements issued.

5. Prior period errors

During the year under review the Municipality identified material errors in the 2015 annual financial statements. This financial impact on the 2015 financial statements were identified, adjusted and disclosed as a prior period error note in the 2016 annual financial statements.

6. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

Name

Mr T. Jansen van Vuuren

7. Auditors

Auditor General of South Africa will continue in office for the next financial period.

Statement of Financial Position as at 30 June 2016

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1. Presentation of Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in the South African Rand, which is the functional currency of the Municipality.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below. All amounts have been rounded off to the nearest rand.

1.1 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Trade receivables

The municipality assesses its trade receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows or service potential used to determine the value-in-use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including production estimates and service potential, together with economic factors such as exchange rates, inflation and interest.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 17 - Provisions.

Useful lives of property, plant and equipment and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for property, plant and equipment and other assets. This estimate is based on the pattern in which an asset's future economic benefits or service potential are expected to be consumed by the municipality. Management will increase the depreciation charge where useful lives are less than previously estimated useful lives.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.1 Significant judgements and sources of estimation uncertainty (continued)

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in note 14.

Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

Allowance for doubtful debts

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.2 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Subsequent measurement

Subsequent to initial measurement investment property is measured using the cost model. The investment property is measured at cost less accumulated depreciation and accumulated impairment losses. The investment property is depreciated over a period of 30 years.

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Accounting Policies

1.2 Investment property (continued)

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

1.3 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
-------------	----------------------------

1.4 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.5 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

An intangible asset acquired through a non-exchange transaction, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software, internally generated	3 years
Computer software, other	3 years

1.6 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Recognition

The Municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the Municipality, and the cost or fair value of the asset can be measured reliably.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.6 Heritage assets (continued)

Initial measurement

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition.

Subsequent measurement

After recognition as an asset, a class of heritage assets is carried at its cost less any accumulated impairment losses.

Impairment

The Municipality assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the Municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

Derecognition

The Municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

1.7 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one Municipality and a financial liability or a residual interest of another Municipality.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from a Municipality's statement of financial position.

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract (sometimes called the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors.
- It is settled at a future date.

A financial asset is:

- cash;
- a residual interest of another Municipality; or
- a contractual right to:
 - receive cash or another financial asset from another Municipality; or
 - exchange financial assets or financial liabilities with another Municipality under conditions that are potentially favourable to the Municipality.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.7 Financial instruments (continued)

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another Municipality; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the Municipality.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by a Municipality in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Classification

The Municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Investments	Financial asset measured at amortised cost
Consumer debtors	Financial asset measured at amortised cost
Receivables from exchange transactions	Financial asset measured at amortised cost
Receivables from non-exchange transactions	Financial asset measured at amortised cost

The Municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Consumer deposits	Financial liability measured at amortised cost
Trade and other payables from exchange transactions	Financial liability measured at amortised cost
Unspent conditional grants and receipts	Financial liability measured at amortised cost
Finance leases	Financial liability measured at amortised cost
Payables from non-exchange transactions	Financial liability measured at amortised cost

Initial recognition

The Municipality recognises a financial asset or a financial liability in its statement of financial position when the Municipality becomes a party to the contractual provisions of the instrument.

The Municipality recognises financial assets using trade date accounting.

Initial measurement of financial assets and financial liabilities

The Municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.7 Financial instruments (continued)

Subsequent measurement of financial assets and financial liabilities

The Municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the Municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, a Municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Short term receivables and payables are not discounted where the initial credit period granted or received is consistent with terms used in the public sector, either through the establishment of practices or legislation.

Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

Impairment and uncollectibility of financial assets

The Municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly OR through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.7 Financial instruments (continued)

Derecognition

Financial assets

The Municipality derecognises financial assets using trade date accounting.

The Municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the Municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the Municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the Municipality :
 - derecognise the asset; and
 - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

Financial liabilities

The Municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another Municipality by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the Municipality currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the Municipality does not offset the transferred asset and the associated liability.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.8 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

1.9 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.10 Construction contracts and receivables

Construction contract is a contract, or a similar binding arrangement, specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and function or their ultimate purpose or use.

Contractor is an entity that performs construction work pursuant to a construction contract.

Cost plus or cost based contract is a construction contract in which the contractor is reimbursed for allowable or otherwise defined costs and, in the case of a commercially-based contract, an additional percentage of these costs or a fixed fee, if any.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.10 Construction contracts and receivables (continued)

Fixed price contract is a construction contract in which the contractor agrees to a fixed contract price, or a fixed rate per unit of output, which in some cases is subject to cost escalation clauses.

A contractor is an entity that enters into a contract to build structures, construct facilities, produce goods, or render services to the specifications of another entity either itself or through the use of sub-contractors. The term "contractor" thus includes a general or prime contractor, a subcontractor to a general contractor, or a construction manager.

The entity assesses the terms and conditions of each contract concluded with customers to establish whether the contract is a construction contract or not. In assessing whether the contract is a construction contract, an entity considers whether it is a contractor

Where the outcome of a construction contract can be estimated reliably, contract revenue and costs are recognised by reference to the stage of completion of the contract activity at the reporting date, as measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs.

Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent that contract costs incurred are recoverable. Contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected deficit is recognised as an expense immediately.

1.11 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Identification

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also test a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Basis for estimates of future cash flows

In measuring value in use the municipality:

- base cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the asset. Greater weight is given to external evidence;
- base cash flow projections on the most recent approved financial budgets/forecasts, but excludes any estimated future cash inflows or outflows expected to arise from future restructuring's or from improving or enhancing the asset's performance. Projections based on these budgets/forecasts covers a maximum period of five years, unless a longer period can be justified; and
- estimate cash flow projections beyond the period covered by the most recent budgets/forecasts by extrapolating the projections based on the budgets/forecasts using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. This growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used, unless a higher rate can be justified.

Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

Accounting Policies

1.11 Impairment of cash-generating assets (continued)

Reversal of impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

1.12 Employee benefits

1.13 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.13 Provisions and contingencies (continued)

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an municipality:

- has a detailed formal plan for the restructuring, identifying at least:
 - the activity/operating unit or part of a activity/operating unit concerned;
 - the principal locations affected;
 - the location, function, and approximate number of employees who will be compensated for services being terminated;
 - the expenditures that will be undertaken; and
 - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 42.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.13 Provisions and contingencies (continued)

Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity test the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy 1.11 and .
- changes in the liability alter the revaluation surplus or deficit previously recognised on that asset, so that:
 - a decrease in the liability is credited directly to revaluation surplus in net assets, except that it is recognised in surplus or deficit to the extent that it reverses a revaluation deficit on the asset that was previously recognised in surplus or deficit; and
 - an increase in the liability is recognised in surplus or deficit, except that it is debited directly to revaluation surplus in net assets to the extent of any credit balance existing in the revaluation surplus in respect of that asset;

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

1.14 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.14 Revenue from exchange transactions (continued)

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by surveys of work performed.

Interest, royalties and dividends

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

1.15 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an , which represents an increase in net assets, other than increases relating to contributions from owners.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.15 Revenue from non-exchange transactions (continued)

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

Gifts and donations, including goods in-kind

Gifts and donations, including goods in kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

1.16 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

1.17 Comparative figures

Where necessary, the 2015 financial figures have been reclassified to conform to changes in presentation in the 30 June 2016 financial year.

1.18 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.18 Unauthorised expenditure (continued)

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.19 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.20 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998), or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.21 Presentation of currency

These annual financial statements are presented in South African Rand.

1.22 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

1.23 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

1.24 Budget information

Municipality are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2015 to 30/06/2016.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Accounting Policies

1.24 Budget information (continued)

The budget for the municipality includes all the municipality's approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury.

Comparative information is not required.

1.25 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

1.26 Value-added tax

The Municipality accounts for value-added tax on an accrual basis. However the VAT paid / due to/by SARS is accounted for on a cash basis.

1.27 Biological assets

A biological asset is a living animal or plant. The key feature that differentiates agricultural activities from other related activities is the intended use of the assets. As the Municipality does not actively manage the activity nor do the assets undergo a biological transformation, it is not an agricultural activity and therefore the assets are treated under the standards other than that of GRAP 27. The auction price is used to determine the fair market value of the biological assets.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Notes to the Financial Statements

2. New standards and interpretations

2.1 Standards, amendments to standards and interpretations

The following Standards of GRAP and / or amendments thereto have been issued by the Accounting Standards Board. The municipality has adopted some of these new Standards or amendments thereto, or has referred to them for guidance in the development of accounting policies in accordance with GRAP 3 as read with Directive 5.

GRAP 1 (as revised 2012): Presentation of Financial Statements

The revision resulted in various terminology and definition changes. Additional commentary has been added, describing the purpose of financial statements in the public sector.

Commentary has been added to explain that where legislation requires a departure from a particular Standard of GRAP and that departure is material, entities cannot claim compliance with the Standards of GRAP. The municipality has early adopted the amendment for the first time in the 2013 annual financial statements. The impact of the amendment is not material.

GRAP 3 (as revised 2012): Accounting policies, Changes in Accounting Estimates and Errors

The revision resulted in various terminology and definition changes.

Paragraphs added to Changes in accounting policies

- A change from one basis of accounting to another basis of accounting is a change in accounting policy.
- A change in the accounting treatment, recognition or measurement of a transaction, event or condition within a basis of accounting is regarded as a change in accounting policy.

Selection of accounting policies

- The reference to the Accounting Practices Committee (APC) of SAICA has been deleted from paragraph .11 on the basis that it is not a standard setter and that entities would consider information from a wide range of sources in formulating an accounting policy and not just the pronouncements of the APC.
- Commentary on the selection of benchmark and alternative accounting policies has been deleted.

The effective date of the amendment is for years beginning on or after 1 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements. The impact of the amendment is not material.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Notes to the Financial Statements

2. New standards and interpretations (continued)

GRAP 9 (as revised 2012): Revenue from Exchange Transactions

Amendments were made to the scope and definitions. All amendments to be applied retrospectively. The effective date of the amendment is for years beginning on or after 01 April 2013.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements. The impact of the amendment is not material.

GRAP 12 (as revised 2012): Inventories

The revision resulted in various terminology and definition changes.

Cost formulas:

Paragraph .34 was amended and .35 was added to separate the principle from the exception when applying the cost formula for inventories with a similar nature and use to the entity.

Recognition as an expense:

Where reference has been made to 'net realisable value', 'current replacement cost' has been added.

All amendments to be applied retrospectively

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements. The impact of the amendment is not material.

GRAP 13 (as revised 2012): Leases

The revision resulted in various terminology and definition changes.

Scope:

Paragraph .04 has been included to clarify that this Standard does not apply to lease agreements to explore for or use natural resources such as oil, gas, timber, metals and other mineral rights and licensing agreements for such items as motion picture films, video recordings, plays, manuscripts, patents and copyrights.

Non-current Assets Held for Sale and Discontinued Operations:

Paragraph .51 has been added to clarify that finance lease assets classified as held for sale in accordance with the Standard of GRAP on Non-current Assets Held for Sale and Discontinued Operations shall be accounted for in accordance with that Standard.

Guidance on accounting for finance leases by lessors:

The paragraph (previously paragraph .53) that provided guidance on the recognition of assets where entities enter into arrangements with private sector entities has been deleted as the Guideline on Accounting for Public Private Partnerships supersedes this guidance.

Guidance on operating lease incentives and substance over legal form:

The guidance included in the original text on substance over legal form has been deleted.

Classification of leases on land and buildings elements:

The guidance on the classification of land and buildings has been amended to ensure that the element of the lease relating to the land is classified as a finance lease where significant risks and rewards have been transferred, despite there being no transfer of title, consistent with the general classification guidance.

All amendments to be applied retrospectively.

The municipality has early adopted the amendment for the first time in the 2013 annual financial statements.

GRAP 16 (as revised 2012): Investment Property

Notes to the Financial Statements

2. New standards and interpretations (continued)

The revision resulted in various terminology and definition changes.

Recognition of investment property:

- Additional commentary has been included in paragraph .19 and .20 to explain paragraph .18 that outlines the recognition criteria for investment property.
- This Standard includes investment property under construction as it was inconsistent with the requirement that investment property being redeveloped was still within the scope of this Standard, but not the initial development. As a result paragraphs .10 and .11 were amended, paragraphs .60 and .61 inserted, and paragraphs .25 and .65(e) of the original text deleted.
- The measurement principles were also amended accordingly to allow investment property under construction to be measured at cost if fair value cannot be measured reliably, until such time as the fair value can be measured reliably.
- Additional guidance has been included in the examples of investment property to clarify that the rentals earned do not have to be on a commercial basis or market related for the property to be classified as investment property.

All amendments to be applied prospectively.

The effective date of the amendment is for years beginning on or after 01 April 2013. The impact of the amendment is not material.

GRAP 17 (as revised 2012): Property, Plant and Equipment

The revision resulted in various terminology and definition changes. Amendments were made to definitions, measurement at recognition, disposals and disclosure. Changes were made to the Standard of GRAP on Property, Plant and Equipment (as revised in 2010) to ensure the consistent application of the principle where assets are acquired in exchange for non-monetary assets when the exchange transaction lacks commercial substance. Furthermore the requirement to disclose property, plant and equipment that were temporarily idle, has been clarified.

All amendments to be applied prospectively. The effective date of the amendment is for years beginning on or after 01 April 2013. The municipality has early adopted the amendment for the first time in the 2013 annual financial statements. The impact of the amendment is not material.

Scope:

- The recognition and measurement of exploration and evaluation assets have been added to the scope exclusions.
- Investment properties under construction have been removed from the scope.

Measurement at initial recognition:

Paragraph .23 and .24 have been amended to clarify that the guidance applicable to determine fair value for revalued assets applies equally to the initial measurement of items of property, plant and equipment at fair value.

Depreciable amount and depreciation period:

An additional paragraph has been added to clarify that reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Derecognition:

- The requirement to not classify gains from the disposal of property, plant and equipment as revenue, has been removed.
- Paragraph .79 has been added in line with the IASB Improvements Project to clarify that where assets are held for rental to others in the ordinary course of operations and the entity subsequently sells the assets, the Standard of GRAP on Non-current Assets Held for Sale and Discontinued Operations does not apply. Rather, these assets are to be transferred and treated in accordance with the Standard of GRAP on Inventories.

Disclosures:

- The required disclosures in paragraph .90 have been amended to encouraged disclosures. Added to the list of encourage disclosures is the fair value disclosure of assets where the cost model is used.
- The requirement to disclose the cost basis for revaluated assets was removed.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Notes to the Financial Statements

2. New standards and interpretations (continued)

Amendments to be applied as follow:

- Paragraphs .05, .23 and .24 were amended and paragraph .79 was added by the Improvements to GRAP issued in 1 April 2011. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 April 2011. If an entity elects to apply these amendments earlier, it shall disclose this fact.
- Any other amendments to the Standards of GRAP shall be applied retrospectively.

The effective date of the amendment is for years beginning on or after 1 April 2011.

The revision resulted in certain terminology changes.

Social benefits:

Paragraphs .08 and .16(a) clarify that social benefits due at year end are 'payables', as the amounts due are certain in terms of legislation.

Binding agreements for restructurings:

Paragraph .87 has been amended to clarify that restructurings may take place in the public sector in terms of directives, legislation or other means. These alternative means are enforceable and may give rise to an obligation.

Interpretations:

In developing the Standard initially, the Board included relevant text from any Interpretation that had been issued by the International Financial Reporting Interpretations Committee (IFRIC) relating to provisions, contingent liabilities and contingent assets. The Board included selected text from IFRIC 1 on Changes in Decommissioning, Restoration and Similar Liabilities and IFRIC 5 Rights to Interests Arising from Decommissioning, Restoration and Environmental Rehabilitation Funds in line with the Board's decisions. The Board concluded at its May 2008 meeting that it would issue any Interpretations as separate documents rather than dispersing the text of the Interpretations across various Standards. As a result, paragraphs .37 to .43, .74 to .80, and Appendix F of the previous version of GRAP 19, have been deleted.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 1 April 2011.

The municipality expects to adopt the amendment for the first time in the 2012 financial statements.

2.2 Standards and interpretations issued, but not yet effective

The following standards of GRAP and Interpretations of standards of GRAP approved, but for which the Minister of Finance has not yet determined an effective date.

Standard / Interpretation:	Effective date: Years beginning on or after	Expected impact
GRAP 20 - Related Party Disclosures	No effective date determined by the Minister of Finance	No significant impact
GRAP 32 -Service Concession Arrangements: Grantor	No effective date determined by the Minister of Finance	No significant impact
GRAP 108 - Statutory Receivables	No effective date determined by the Minister of Finance	No significant impact
GRAP 109 - Accounting by Principals and Agents	No effective date determined by the Minister of Finance	No significant impact

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires an municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when a municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

Notes to the Financial Statements

2. New standards and interpretations (continued)

GRAP25 defines, amongst others, the following:

- Employee benefits as all forms of consideration given by a municipality in exchange for service rendered by employees;
- Defined contribution plans as post-employment benefit plans under which a municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods;
- Defined benefit plans as post-employment benefit plans other than defined contribution plans;
- Multi-employer plans as defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that:
 - pool the assets contributed by various entities that are not under common control; and
 - use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the municipality that employs the employees concerned;
- Other long-term employee benefits as employee benefits (other than post-employment benefits and termination benefits) that is not due to be settled within twelve months after the end of the period in which the employees render the related service;
- Post-employment benefits as employee benefits (other than termination benefits) which are payable after the completion of employment;
- Post-employment benefit plans as formal or informal arrangements under which an municipality provides post-employment benefits for one or more employees;
- Short-term employee benefits as employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service;
- State plans as plans other than composite social security programmes established by legislation which operate as if they are multi-employer plans for all entities in economic categories laid down in legislation;
- Termination benefits as employee benefits payable as a result of either:
 - an entity's decision to terminate an employee's employment before the normal retirement date; or
 - an employee's decision to accept voluntary redundancy in exchange for those benefits;
- Vested employee benefits as employee benefits that are not conditional on future employment.

The standard states the recognition, measurement and disclosure requirements of:

- Short-term employee benefits;
 - All short-term employee benefits;
 - Short-term compensated absences;
 - Bonus, incentive and performance related payments;
- Post-employment benefits: Defined contribution plans;
- Other long-term employee benefits;
- Termination benefits.

The standard states Post-employment benefits: Distinction between defined contribution plans and defined benefit plans:

- Multi-employer plans;
- Defined benefit plans where the participating entities are under common control;
- State plans;
- Composite social security programmes;
- Insured benefits.

The standard states, for Post-employment benefits: Defined benefit plans, the following requirements:

- Recognition and measurement;
- Presentation;
- Disclosure;
- Accounting for the constructive obligation;
- Statement of financial position;
- Asset recognition ceiling;
- Asset recognition ceiling: When a minimum funding requirement may give rise to a liability;
- Statement of financial performance.

The standard prescribes recognition and measurement for:

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Notes to the Financial Statements

2. New standards and interpretations (continued)

- Present value of defined benefit obligations and current service cost:
 - Actuarial valuation method;
 - Attributing benefits to periods of service;
 - Actuarial assumptions;
 - Actuarial assumptions: Discount rate;
 - Actuarial assumptions: Salaries, benefits and medical costs;
 - Actuarial gains and losses;
 - Past service cost.
- Plan assets:
 - Fair value of plan assets;
 - Reimbursements;
 - Return on plan assets.

The standard also deals with Entity combinations and Curtailments and settlements.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 1 April 2013.

The Municipality has adopted the standard for the first time in the 2014 financial statements.

IGRAP1 (as revised 2012):Applying the probability test on initial recognition of revenue

Paragraphs .03, .04, .05, .06, .08 and .10, were amended and paragraph .02 was added in the Interpretation of the Standards of GRAP.

This Interpretation of the Standards of GRAP now addresses the manner in which an entity applies the probability test on initial recognition of both:

- (a) exchange revenue in accordance with the Standard of GRAP on Revenue from Exchange Transactions and
- (b) non-exchange revenue in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

This Interpretation of the Standards of GRAP supersedes the Interpretation of the Standards of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue issued in 2009.

The effective date of the amendment is for years beginning on or after 1 April 2013.

The municipality could not implement IGRAP1 in the 2014 financial year due to challenges experienced on the extraction of information. In the 2015 financial year the new traffic fines management system has been implemented. The municipality adopted IGRAP 1 for the 2015 financial year. The standard was applied retrospectively.

3. Other property, plant and equipment - Game (continued)

Methods and assumptions used in determining fair value

In the 2014 financial year the Municipality had incorrectly applied GRAP 12 and accounted for the game as inventory. However this game do not meet the definition of inventory as it is not held to be sold or used in the ordinary course of operations, nor is this the agricultural produce at the point of harvest. The activities undertaken are for recreational purposes, i.e. biological assets are on nature reserves, and are not agricultural activities for the purpose of GRAP 27. The auction price has been used in the determination of the market value.

4. Investment property

Financial Statements for the year ended 30 June 2016

Notes to the Financial Statements

Figures in Rand	2016	2015
-----------------	------	------

11. Receivables from non-exchange transactions

Traffic fines	4 125 596	3 050 757
Government grants and subsidies	1 923 228	6 033 473
Housing/erven loans	4 810 829	4 855 325
Damage Minisub NO021 Phola Zone 5	31 372	31 372
Recoverable projects	340 496	334 496
	11 231 521	14 305 423

TRAFFIC FINES

The Municipality adopted IGRAP1 in the 2015 financial year. The receivable was not adjusted for any possible discounts as it is not the Municipality's policy to provide for early settlement discounts to offenders that pay fines within the required timeframe. The AARTO system has not yet been implemented for the Mpumalanga province.

HOUSING/ERVEN LOANS

When Council sells land to the public, a 60 day period is given for applying for a bond and registration thereof. By failing to do so, the transaction is cancelled.

Reconciliation of provision for impairment of receivables from non-exchange transactions

Opening balance revenue from non-exchange transactions- 1 July 2015	3 050 757	7 370 413
Revenue raised - 2015 and 2016	18 479 550	13 183 050

	4 967 491	6 184 812

The Municipality enters into finance lease arrangements with the ABD Financial Services (Pty) Ltd. The Municipality leases it photo copier machines. The average lease term is 3 years and the average effective borrowing rate is 7% for all new leases entered into. (2015: 9%). Interest rates are fixed at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

15. Unspent conditional grants and receipts

Unspent conditional grants and receipts comprise of:

Unspent conditional grants and receipts

Municipal Revenue Enhancement Program	9 804	9 804
NDPG	3 158 967	-
Human Settlement Grant	18 248 145	53 630 112
	21 416 916	53 639 916

Municipal Revenue Enhancement Program - Improvement of collection rate

Expanded Public Works Program - To provide Expanded Public Works Programme (EPWP) funding to expand job creation efforts in specific focus areas, where labour intensive delivery methods can be maximised

MIG -To provide specific capital finance for eradicating basic municipal infrastructure backlogs for poor households, micro enterprises and social institutions servicing poor communities

Department of Energy - Funds used to implement electricity savings projects in municipal infrastructure

Human settlement Grant - The creation of sustainable and integrated human settlements that enable an improved quality of household life and access to basic services

See Note 22 for reconciliation of grants from other spheres of government. These amounts are invested in a ring-fenced investment until utilised.

-----------------	------	------

17. Provisions (continued)

Provision for rehabilitation of landfill sites relates to the legal obligation to restore and rehabilitate the Kriel, Leeuwpoort and Phola landfill sites used for waste disposal. The risks and uncertainties that inevitably surround many events and circumstances shall be taken into account in reaching the best estimate of a provision.

Risk describes variability of outcome. A risk adjustment may increase the amount at which a liability is measured. Caution is needed in making judgements under conditions of uncertainty, so that revenue or assets are not overstated and expenses or liabilities are not understated. However, uncertainty does not justify the creation of excessive provisions or a deliberate overstatement of liabilities. For example, if the projected costs of a particularly adverse outcome are estimated on a prudent basis, that outcome is not then deliberately treated as more probable than is realistically the case. Care is needed to avoid duplicating adjustments for risk and uncertainty with consequent overstatement of a provision.

It was found that the municipality did not have sufficient funds for the provision. Management then chose to use the government bond yield rate as indicated in the Yield Rate sheet. The adjustment made to the discounting rate was made due to various risks pertaining to the specific landfill site which influences the cash flows and therefore the discounting rate.

Risks that was taken into account and the estimated effect on the discounting rate :

1. The landfill site is fenced off.
2. There are no weight bridge and no records are kept of vehicles entering the site.
3. There is no control over waste types entering the site. This may lead that possible dangerous and hazardous material be dumped in the site that may lead to possible fines.
4. During our inspection of the site, no traces of medical waste were found.
5. The subject property is surrounded by farms.

Quantification of the risk factors:

- | | |
|--------------------------------------|---------|
| 1. The landfill site was fenced off. | - 0.1% |
| 2. No records kept. | + 0.35% |
| 3. Waste types. | + 0.50% |
| 4. No medical waste. | - 0.45% |
| 5. Surrounded by farms. | + 0.25% |

Actuarial method and assumptions

The valuation of the defined benefit obligation is performed at year end by an independent expert.

Objectives

Funding is the making of advance provision to meet the cost of accruing benefit promises. The funding objectives implicit in GRAP25/IAS 19 are to maintain a provision of 100% of the accrued service liability. The maintenance of such a provision gives employees a measure of security in respect of accrued benefit rights and also helps ensure that the employer does not maintain excessive resources within the provision made.

Method

The method of funding prescribed by GRAP 25 is called the "Projected Unit Method". Under this method the accrued service liabilities are determined by projecting all future payments which will be made by the employer in respect of benefits accrued up to valuation date. Assumptions are made in respect of, inter-alia, medical scheme contribution increases, withdrawals, deaths and ill-health, early and normal retirements. These payment are discounted at the valuation rate of discount to determine the present value of the liabilities at the valuation date.

The assumptions used in the calculations as discussed above are set out below.

Pace of funding

It is important to note that the assumptions do not affect the actual cost of the benefit paid, only the pace at which those costs are provided for in the accounts of the Emalahleni Local Municipality.

Emalahleni Local Municipality

Financial Statements for the year ended 30 June 2016

Notes to the Financial Statements

Figures in Rand

2016

2015

17. Provisions (continued)

An exercise of this nature should be completed every 2 to 3 years in order to monitor progress and ensure the strategy adopted is still appropriate.

Death-in-service Benefits

On death-in-service the surviving spouse and dependants are also entitled to the subsidy of 60% of their medical aid contributions. The liability incurred for death is also valued using the projected unit credit method.

Key Assumptions

	2016	2015
Health care cost inflation	7.83%	7.30%
Discount rate	9.26%	8.75%
Real discount rate	1.33%	1.35%
Spouse age difference	4 years	4 years
Continuation at retirement	100%	100%
Retirement age	65 years	65 years
Mortality of in-service members	SA 85-90 (light) Ultimate	SA 85-90 (light) Ultimate
Pensioners mortality tables	PA (90) - 2 Ultimate	PA (90) - 2 Ultimate

The discount rate reflects the time value of money. The discount rate together with the assumed rate of medical scheme contribution inflation has the largest effect on the values of the benefit calculated. The assumed annual rate of discount used to calculate the present value of the liability was 9.26% per annum. This is consistent with yields on long term government bonds with the longest duration R209 as at 13 July 2016.

The employer's liabilities can be summarized as follows:

1. Accrued liability			
Current valuation as at 30 June 2016	Early and normal Retirement R'000	Death Benefit R'000	Total Accrued Liability R'000
Active members	125 919 000	31 239	157 158
Continuation members	65 990	0	65 990
Total	191 909	31 239	223 148

2. Future Service Cost

This represents the annual cost that needs to be funded in order to accrue for the additional liability that will be incurred as a result of people's service over the next year.

1 year cost	01/07/2015 - 30/06/2016 R'000	01/07/2016 - 30/06/2017 R'000
Active members	20 184	21 294
Cost as a % of the Salary of the members on a medical scheme	9.2%	7.10%

3. Interest Cost

The expected interest cost accruing in the year following the valuation date is calculated as:

Accrued Liability	01/07/2015 - 30/06/2016 R'000	01/07/2016 - 30/06/2017 R'000
Eligible Active Members	17 239	20 663

The amount included in revenue arising from non-exchange transactions is as follows:

Taxation revenue		
Property rates	371 266 005	335 273 598
Transfer revenue		
Government grants & subsidies	402 308 755	340 487 512
Public contributions and donations	31 394 817	48 399 334
Fines	20 336 889	14 327 007
	825 306 466	738 487 451

21. Property rates

Rates received

Property rates	371 266 005	335 273 598
----------------	-------------	-------------

eMalahleni, Ga-Nala and Thubelihle

Valuations on land and buildings are performed every four years. The last valuation came into effect on 1st July 2014. The basic rate is 0.012707c in Rand, whilst a rebate of R635.28 p.a (based on the first R50 000 of the valuation roll) is granted to all owners with a "Residential 1,2,3" - zoned property where a house has been erected. Furthermore, an exemption is granted to all pensioners and physical and mentally disabled, who qualifies according to the Property Rates Policy, currently receiving an amount in Pension/ Allowance of up to R150 000 p.a.

Ogies/Phola, Farms & Wilge Township

Rates are the same as for eMalahleni

Kendal Forest

Rate is 0.012707c / Rand values only.

Rural Areas

Rate for Rural Areas is 0.012707c / Rand on land values only.

Valuations

Notes to the Financial Statements

Figures in Rand	2016	2015
30. Debt impairment		
Bad debts	463 569 919	200 959 188
Debt impairment methodology: Past history has been analysed to group the categories of debtors. After performing an assessment on the collectability of debtors, this may have resulted in the adjustment of the debtors category. Outstanding debt is divided into 3 categories when calculating the impairment. The categories are as follows: Category A : No provision is made for Government and current accounts. Category B : 50% provision is made for irregular payer. Category C: 100% provision is made for municipal accounts, indigent and non-payers.		
31. Interest revenue		
Dividend revenue

2016

2015

44. Risk management

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the municipality's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2016

	Not later than one month	Later than one month and not later than three months	Later than three months and not later than one year	Later than one year and not later than five years
Borrowings	1 427 329	2 854 658	12 854 964	-
Finance lease liabilities	256 800	513 600	2 311 200	1 885 899
Trade and other payables	1 973 623 976	-	-	-
Other consumer deposits	116 492 112	-	-	-

At 30 June 2015

	Not later than one month	Later than one month and not later than three months	Later than three months and not later than one year	Later than one year and not later than five years
Borrowings	1 427 329	2 854 659	12 845 964	14 121 841
Finance lease liabilities	332 747	665 495	2 994 730	2 191 840
Trade and other payables	1 632 421 263	-	-	-
Other consumer deposits	113 903 545	-	-	-

Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, and consumer debtors. The municipality only deposits cash with major banks and limits exposure to any one counter-party.

Consumer debtors comprise a widespread community base. The Municipality manages its credit risk through payment of deposits and disconnection in the case of non-payment.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument

	2016	2015
ABSA Bank Limited	(1 118 251)	14 750 129
Trade and other receivables	656 387 679	638 731 495

These balances represent the maximum exposure to credit risk.

45. Going concern

We draw attention to the fact that at 30 June 2016, the municipality had an accumulated deficits of R 5 657 189 866 and that the municipality's total assets exceeds its total liabilities by R 5 657 189 866.

45. Going concern (continued)

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The municipality manages its capital to ensure that the municipality will be able to continue as a going concern while delivering sustainable services to consumers through the optimisation of the debt and equity balance.

The capital structure of the municipality consists of debt, which includes the Long-term Liabilities, Bank, Cash and Cash Equivalents and Equity, comprising Funds, Reserves and Accumulated Surplus as disclosed in the Statement of Changes in Net Assets.

January 2016	165 747
February 2016	245 031
April 2016	682 943
May 2016	945 771
June 2016	481 801
	3 891 394

50. Budget differences

Changes from the approved budget to the final budget

The changes between the approved and final budget are a consequence of reallocations and changes within the approved budget parameters and additional resources required during the year. Refer to Statement of comparison of budget and actual amounts for explanation of material variances.
